

## 2024

#### DEAR CUSTOMERS,

It gives me great satisfaction to introduce you to our new TH Clothes catalogue. In this regard, I would firstly like to express my deep gratitude to all our customers, who have been loyal over the years. Your unshakeable support is the driving force behind our ongoing success.

We have been witnessing the steady growth of our brand, which would not have been possible without the loyalty you place in us. For the year 2024, we have bold plans that will mainly involve investing in new products that will most certainly stand out for their high quality and added value. The premium positioning of the TH Clothes brand in the market is something we have always championed and will continue to consolidate. Our commitment to quality, design and innovation are the basis of this market positioning, and we are therefore committed to moving beyond the standards that have defined us. In this light, one of our main focal points will be the expansion of the sports line. We acknowledge the value of these products and we aim to bring together functionality and style to enhance the sporting activity of all those who buy TH Clothes.

Let me also take this opportunity to show my great excitement about the development of our new website, which aims to offer you an online experience that is more intuitive, more immersive and, above all, that showcases

our commitment to ongoing modernisation and innovation. Whilst we continue with our mission to supply products of outstanding quality, we are also committed to environmental sustainability. That's why we've been embarking on a path towards more responsible practices that lessen our impact on the environment and that will contribute to a greener tomorrow.

At TH Clothes, we understood the relevance of standing out from competitors. In effect, we decided to transform the shopping experience into something unique and distinctive, which would enhance the awareness of our brand. This is how the "Branded Spaces" came about, which will translate a new way of presenting the TH Clothes brand at the point of sale, bringing our products to life and functioning as true brand ambassadors.

On behalf of the entire TH Clothes team I would like to extend my sincere appreciation for being part of this family, as your support and trust are crucial to our continued growth and development. We look forward to another year in which we will share a fruitful partnership and shared success.

Best regards,

A

Mauro Silva CEO

## THIS IS OUR WORLD

TH Clothes is a brand owned by Organizações Biscana, whose headquarters are in the central region of Portugal, more specifically in Batalha. Having started its journey in 2006, the brand appears on the market with the aim of filling the need to supply certified quality products at a fair price. The years that followed, namely between 2010 and 2015, translated into an exponential growth of the brand in the Portuguese market, as a result of the clear commitment to the development of new products with added value for its customers, and consequently, the internationalization of the brand, which became represented in 12 European countries.

2016 was a year of great importance in terms of innovation and new products development. It was in this period that the brand reinforced its avant-garde positioning, with the presentation of 37 new items on the market.

In 2017, with the aim of consolidating its position in the market, TH Clothes' strategy was mainly based on three important pillars: the constant focus on innovation in terms of the development of new products, the doubling of stock, with the brand now having around 6 million items, and finally, we highlight the remarkable work of selecting potential markets and the respective expansion of its distribution, which currently represents sales to 27 countries.

In 2018, the brand once again reinforces its permanent stock, and expands its range of colors, introducing five new items considered essential in the promotional market. That same year, it became a member of Fair Wear Foundation, an international entity that certifies and attests to the brand's collaboration in the constant improvement of working conditions in the factories where its products are produced. 2019 brought a revolution in terms of its color palette, with the brand introducing ten options in the main items of its most important ranges. In the same year, due to market demands, some premium items were also presented, thus reinforcing the archetype of quality and modernism characteristic of the brand.

In 2020, TH Clothes further expanded its range of products, presenting to the market a line of workwear, which reflected the perfect alliance between the quality and durability of materials, with a touch of unique design characteristic of the brand. In the same year, the global pandemic of COVID-19 dictated a new reality and created new needs, and the brand responded with the creation of THC Atlântida and THC Atlântida Kids, a customizable mask with the CITEVE level III seal of approval for protection society against COVID-19.

In 2021, the brand once again continues its innovative tradition and launches the first sneaker on the market with a removable and customizable patch. It was also the first year of the Less Plastic Initiative, an action that aims to demonstrate the brand's commitment to significantly reducing plastic consumption.

2022 brings with it continuity, both in terms of investing in new products and the introduction of new colors, however, what stands out most this year was the effort to develop substantially more efficient logistics, with the modernization of the layout of the main warehouse in Portugal and consequently with the introduction of a new intelligent software, which made possible a faster and more assertive dispatch of all its products. In yet another field, and in order to complement the brand's approach to customers, a new website was presented, with a more modern and intuitive design.

# THIS IS OUR CULTURE

Today our vision is a reality. The Better Cotton Initiative (BCI), or simply Better Cotton, is the largest cotton sustainability program in the world. In just over a decade, BCI has managed to convince stakeholders that span the sector to be it's partners, namely, farmers, ginners, spinners, suppliers, manufacturers, brand owners, retailers, adding now more than 2,300 members in the Better Cotton network.

TH Clothes has always taken on a huge commitment with the quality of its products. Proof of this is the obtaining of the Standard 100 by Oeko-Tex certificate, which aims to guarantee the use of regulated substances free from health hazards. Obtaining this certificate is a worldwide synonym that ensures responsible textile manufacturing, and consequently, represents a guarantee for industry, commerce and consumers.

The GRS seal is an in-depth certification that not only guarantees the recycled content of the product (minimum: 20%), but also ensures a sustainable production, the absence of harmful chemicals and ethical conditions of work. This international product standard was created by Certifications Control Union in 2008 and is currently owned by Textile Exchange.

The Recycled Claim Standard (RCS) is a voluntary international standard that establishes requirements for third-party certification of recycled content and chain of custody. The goal is to increase the use of recycled materials. The RCS reference does not address the use of chemicals or other social or environmental aspects of production beyond the integrity of the recycled material. RCS is based on chain requirements Content Claim Standard (CCS) custody.

In order to ensure working conditions for people in the ready-made garments industry and to avoid incidents in the countries where we purchase our products, TH Clothes considered essential to become a member of the International Health and Safety Agreement in Textile and Clothing Industry (International Agreement).

This agreement is legally binding between clothing brands and unions, with the aim of making textile factories safer. TH Clothes thus takes extreme care with the working conditions of all those who contribute to the production of its products, so it provides all the guidelines so that they are safe throughout the production process. In this way, TH Clothes, in partnership with Bangladesh suppliers, ensures that all measures are being taken to build a better future for the clothing business.

Our ECO FRIENDLY seal represents the commitment to sustainability. Increasingly aware of the importance of adopting environmentally friendly practices, we strive to reduce our environmental footprint by using recycled materials and promoting and supporting nature preservation initiatives. This seal is not just a symbol but a continuous commitment to a greener and healthier future for present and future generations.

We are currently experiencing a worldwide appeal for a more active and intense awareness of packaging, so, following its plastic reduction process, the brand has increasingly invested in the use of biodegradable materials, such as cardboard. This time, a program was created to reuse all shipping packaging, in order to minimize waste and ensure responsible use.

LESS PLASTIC! THIS IS NOT JUST AN ACTION, IT'S A POSITION!

TH Clothes takes environmental responsibility very seriously, and It's precisely for this reason, and committed to reducing plastic consumption in our transactions, that we have decided to reduce drastically this material in most of our packaging. In addition to this measure, we have eliminated plastic straps in our boxes, which is another step in strengthening our commitment to environmental responsibility.

The DNA of the Portuguese people is widely recognized in the textile world. Its success story dates back to the 16th century with the construction of the sails used by Portuguese ships. Since that time, the quality of construction and the design of Portuguese brands is appreciated all over the world, so these were the bases that contributed to the fact that, nowadays, Portuguese textiles mean flexibility, speed, consolidated knowledge and innovation.

Based on these premises, TH Clothes continues to invest heavily in the quality of its products and in the expansion of its ranges, always with the vision of a future marked by differentiation and added value at the most diverse levels.

## POLO SHIRTS

Polo shirts have been constantly evolving since their invention in the 19<sup>th</sup> century. In addition to its common use linked to sports, polo shirts are gaining more and more fans in the promotional market. Being a product of excellence, our polo shirts are a unique and distinct product that go beyond refinement, managing to reconcile elements such as quality, durability, and detailed finishes.

\_

The Adam and Eve polo shirts were named following the principle that they would be the first two pieces to mark the future growth of the TH Clothes brand. Their "offspring" is now over 50 articles.
